Your AI agents are on their way. Is your enterprise ready?

SAP is moving from transactional ERP to agentic execution. Autonomous Enterprise redefines work, value and accountability.

Learn how to prepare your organization.

Four decisions for your leadership team.

Business Value
Where can AI agents create measurable process value?

Architecture
What needs to be ready for autonomous agent execution?

Governance
What can be delegated and who remains accountable?

Commercials
What do AI units, pricing models and consumption mean for the business case?

In 60 minutes, a clear next step.

1. **A shared C-level view**
   of what SAP's Autonomous Enterprise means for your business – beyond product marketing.
2. **A first board-ready frame**
   across value, architecture, commercials and governance – ready to socialize internally.
3. **First orientation**
   on value areas and complexity indication – the starting point for your next steps.

ONE DECISION. ONE ROOM. FOUR C-LEVEL PERSPECTIVES.

60 minute Executive Expert Session

Connecting value, architecture, governance and commercials into one shared decision frame.

Designed for C-level leaders
CIO · CFO · COO · CHRO
